Study Title: Measuring Hope and Hopelessness in Cancer.

Brief description of the study: This study is part of a larger project developed and designed in New York. We will be involved in Stage I data collection of 100 participants. From this study, we endeavor to study the correlation between a subjective sense of courageousness and that of fear in people with advance and terminal cancer.

Study Methodology: (Please mark with an x which type of study methodology)

	Epidemiology
	Health Services / Health Economics / Quality Improvement
x	Qualitative, Observational or Descriptive
	Mixed Method
	Systematic Review
	Intervention: RCT
	Intervention: Comparative or cohort study
	Intervention: Case series
