CareSearch Project Research Studies Register: Registration Proforma	0169

Study Title: Implementing principles of end-of-life care in acute care settings

Brief description of the study: This project will investigate what are the indicators of effective implementation of the elements of the AHSQC Consensus Statement: Essential elements for recognising and responding to clinical deterioration and how should these indicators be assessed? aims to develop: 1. Practice indicators/baseline to map current delivery of Consensus Statement elements 2. Strategies to optimise uptake of elements of Consensus Statement

Study Methodology: (Please mark with an x which type of study methodology)

	Epidemiology
	Health Services / Health Economics / Quality Improvement
	Qualitative, Observational or Descriptive
X	Mixed Method
	Systematic Review
	Intervention: RCT
	Intervention: Comparative or cohort study
	Intervention: Case series

Project details:

Funding source (Optional): CRE in End of Life Care (NHMRC)

Has the study received ethics approval?		Yes	**X**	No		Not applicable
Project starting date: September 2015						
Project completion date: December 2017						
Multi site:	**X**	Yes		No		Not applicable
