

## CARESEARCH NURSES HUB SUPPORTS NURSES CARING FOR PALLIATIVE PATIENTS IN THE COMMUNITY, IN HOSPITALS AND IN SPECIALIST SETTINGS

Palliative care is an important area of clinical care providing care when a disease cannot be cured. Nurses are a critical part of this multidisciplinary care. Given an ageing population and increasing number of patients with multiple, ongoing and complex conditions, nurses in many different settings will look after patients needing palliative care.

The [Nurses Hub](#) is a new section within the [CareSearch website](#). CareSearch is an Australian online resource that promotes the evidence-based practice of palliative care, and provides good quality, practical, up-to-date information and resources to health professionals and the community.

The [Nurses Hub](#) brings together evidence based information and quality resources to help nurses find the information they need to care for their patients. The main sections are:

- [Clinical](#)
- [Areas of Practice](#)
- [Research](#)
- [Education](#)
- [Nurses Providing Palliative Care](#)
- [Policy Quality Standards](#)
- [Resources](#)
- [Nurses News](#)

Good quality information and resources are now available to support the nursing care of any patient with palliative care needs. The Nurses Hub can be found on the CareSearch website.

The [Nurses Hub](#) is free to use and is available when you need it at [www.caresearch.com.au](http://www.caresearch.com.au)
