

CARESEARCH PAGE PROFILE: MULTILINGUAL MODULES (CNIN MARCH 2010)

CARESEARCH RECOGNISES HARMONY DAY ON MARCH 21ST 2010.

March 21st is Harmony Day, and in recognition of this, CareSearch is releasing a set of DVD's that have been translated into 3 languages. We have previously profiled the CareSearch DVD's (CNIN November 2009) describing the seven DVD's that have been made available which show what is contained in each of the sections within the 'For Patients and Families' area of the website.

These seven DVD's have now been translated into [Greek](#), [Cantonese](#) and [Italian](#), and cover the following areas.

About palliative care	Living with a terminal illness
How to care	Groups with specific needs
At the end	Bereavement Grief and Loss
Finding out More	

The numbers of older people from culturally and linguistically diverse backgrounds are projected to increase, from 392,800 in 1996 to 939,800 in 2026. This is a 139% increase over the 30-year period. ([AIHW, 2001](#)). In recognition of the increasing need to provide more information for those from non - English speaking backgrounds, the CareSearch DVD's have been made to provide information on what is available on the website. Other pages within the website hold translated information and other resources (CNIN March 2009, Clinical Uses page).

These DVD's are located within the 'About CareSearch section under '[Project Resources](#)' and have also been located in the [CareSearch DVD's](#) page.

CareSearch is an online resource funded by the Department of Health and Ageing to help clinicians and consumers find relevant evidence about palliative care. Available now at www.caresearch.com.au
