

Natasha has worked the last 10 years in aged care with Padman Health Care, initially as a personal carer having completed her Certificate 3 in Aged Care and then completing her Diploma of Enrolled Nursing in 2005.

Whilst working as a personal carer and finding her role very rewarding when caring for the residents as they reach the end stage of their terminal illness she has further developed her skills and knowledge by attending internal and external education sessions.

Over the last 2 years she has become a Resource Nurse for Skyline Residential Care and attends all workshops at Southern Palliative Care Services and wishes to impart her knowledge to the staff, residents and relatives at Skyline.
