Oceanic Palliative Care
Conference 13–15 Sept 2023

Nurses are the largest group of health professionals who provide care to people with life-limiting conditions across all healthcare settings. To help them respond to increasing demand, the CareSearch Nurses Hub, an online fit-for-purpose resource, provides access to appropriate evidence, resources, and tools to guide their practice. To ensure continued relevance, the CareSearch Nurses Hub was expanded and updated in 2022, creating a resource *with nurses for nurses*.

SCAN FOR NURSES HUB

This project demonstrates (1) the importance of collaborative processes in the improvement of evidence-based resources and (2) the input of nurses is critical in shaping the content development and utility for nurses (end-users).
