

My Learning

'My Learning' are CareSearch modules dealing with common clinical scenarios that show you how to manage them using the evidence-based resources in CareSearch.

Choose from the range of modules described below.

My Learning 1: Finding Evidence (Published Literature)

This module shows you how the Clinical Evidence pages, Review Collection, and PubMed Topic Searches helped Eileen's breathlessness due to non-small cell lung carcinoma.

My Learning 2: Finding Evidence (Searching for Evidence)

You can use some PubMed resources to answer Clare's questions about the vivid and realistic dreams her husband is having about his dead brother.

My Learning 3: Searching the Web

You will learn how to search the web for trustworthy information to help Ruth, who has been diagnosed with stage II melanoma.

My Learning 4: Residential Aged Care

This module profiles resources in the Residential Aged Care section to show you how to help staff at the Kangaroo Valley Aged Care Facility understand if Ken is approaching the end of his life.

My Learning 5: Dementia

In this module, you use dementia resources in CareSearch to help Anna and her family agree on a dementia care plan for their father Lou.

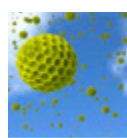

My Learning 6: Carers

You will learn how to find information to help Lana, a single mother to ten-year-old twins, cope with caring for her ailing mother.

My Learning 7: Knowledge Translation

This module looks at how a clinical team uses the Knowledge to Action cycle to improve outcomes for patients. This module was developed for the Centre for Research Excellence in End of Life Care.

My Learning 8: Disseminating Research Findings

This module is about communicating research findings in a thoughtful, planned way. Developed for the Centre for Research Excellence in End of Life Care, it helps researchers and higher degree students.

My Learning 9: New to Palliative Care?

This module is an introduction to palliative care for those who are new to the specialty.

My Learning 10: Allied Health

Carly has been admitted to Dove House Hospice for symptom control. She and her family would benefit from multi-disciplinary care. Find out how Allied Health Professionals support patients and families at the end of life.
