

CARESEARCH INFORMATION SHEET NO. 12:

PALLIATIVE CARE FILTER SEARCH SYNTAX

This technical note is not for the faint hearted! It is a transparent record of the URL syntax used to represent the palliative care filter in CareSearch PubMed Topic Searches.

This search will retrieve a very large number of records that will be relevant to palliative care. This can be used to restrict a particular topic of broader interest to the palliative care literature, as CareSearch has done in its [Palliative Care PubMed Searches](#). For instructions on how to do this with other topics you are interested in, see [Create Your Own Palliative Care PubMed Search](#). If you already know how to do this, you may wish to [run the palliative care filter](#) now.

Technically this search uses Concepts 2, 4 and 5 as described in [Technical Notes](#), where Concept 2 retrieves references from Medline, and Concept 4 NOT Concept 5 retrieves articles from PubMed. A colour key provides a reference point for the different components of the search.

Colour Key

- Pink** = The phrase that PubMed provides to initiate a real time PubMed search
 - Red** = The palliative care filter developed through published research (Concept 2)
 - Orange** = Modified palliative care filter (Concept 4)
 - Purple** = Exclusion of Medline records (Concept 5)
 - Light Blue** = Restrict to English (Additional Concept)
- Note that all key Boolean operators are in black to highlight the separation of key concepts.

The Search
